

Technical Specifications

Battery Type:	MAINTENANCE_FREE BATTERY	Container Material / Colour:	Polypropylene / White
Voltage:	12 V	Lid Material / Colour:	Polypropylene / White
Capacity (@20hr rate):	120 Ah	Lid Type:	KAMINA
Cold Cranking Amps -18°C, SAE:	900A	Separator Type:	Envelope & Glass-Mat
Cold Cranking Amps - 0°C SAE:	1000 A	Plate Type:	Silver-Calcium
Reserve Capacity:	260 Min	Assembly Layout:	3 (LHP)
Overall Dimensions:	L515 xW175 x H210	Terminal Type:	1 (SAE)
Wet Battery Weight:	32.5 Kg	Bottom Hold-downs:	B3 (All Four Sides)

The EURON120 is a heavy duty starting battery designed specifically for European truck, buses & farm machinery.

- Built to cope with both high-current starting loads and heavy electrical accessory loads.
- Correct DIN (European) specifications & dimensions for fast, easy installation.
- Calcium-Calcium plates in sealed MF casing for true maintenance-free operation; no servicing, no top-ups, no spillage, no corrosion.
- Stronger full-frame plates with added silver for faster charge acceptance in vehicles with computerised “fuel-saver” charging systems.
- Combination Glass-Mat/Envelope Separators for longer life in high vibration and high cycle applications.

Applications

Tractors & Agricultural Machinery:

APOLLO, CLAAS, MST, NEW HOLLAND, JOHN DEERE (Euro Models), ZETOR, SOTA, AGCO, SAME
